Managed Services - Level 1 (\$36/month/workstation)

- Enterprise-grade FULLY-MANAGED endpoint protection
- 24/7 system-wide monitors that find and repair issues before you are even aware of a problem
- Alerts are automatically sent to our techs any time a problem is not immediately resolved.
- Maintenance is completed on a constant basis.
- Includes ACS Cloud-Based Firewall protecting each workstation regardless of location

Managed Services - Level 2 (\$46/month/workstation)

- All the services from Level 1 plus remote support
- **Phone, Shop, and Remote Support for issues with basic hardware, software, and security issues.** *This does not include research, installation, configuration, or training of third party software. ACS provides this service on a project basis.*

Managed Services - Level 3 (\$66/month/workstation)

- All the services from Level 2 plus **onsite support**

Managed SERVER - Level 3 Only (\$150/month/server) includes all of the service in Workstation Level 3 for a Windows SERVER operating system including oversight of the Active Directory, DHCP/DNS, and File/Print server roles.

Managed NETWORK (\$100/month) - Phone, shop, remote, and onsite support for existing network appliances (modem, routers, switches) and existing network wiring.
